SEVENTY-TWO®

XL1200V | PRODUCTION COLOR: BLACK QUARTZ

A few key mods are all it takes to turn this Seventy-Two® model into a long, low hot rod. The rolled-down Drag Bar puts riders in a café racer position. The distressed leather and brass rigid-mount Bobber Solo Saddle takes “minimal” to a new level, and the narrow whitewall tires and retro Smooth Air Cleaner Cover add a nostalgic touch.

SPORTSTER®

FORTY-EIGHT®

XL1200X | PRODUCTION COLOR: HARD CANDY BIG RED FLAKE

The first thing you notice on this Forty-Eight® model is the eye-popping Hard Candy Big Red Flake paint on the classic "peanut" gas tank. But don't miss the edgy Chizeled bars*, Burst Collection foot controls, and the white piping on the Black Diamond Solo Spring Saddle that add a bit of flair and anchor the bike in old-school cool.

SEVENTY-TWO® TRANSFORMATION

With an authentic '70s chopper attitude, Hard Candy Custom™ paint, and loads of chrome, the Seventy-Two® model rolls off the factory floor as a low-rider-inspired radical custom.

CUSTOM CLASSIC

We've taken this custom Seventy-Two® motorcycle even deeper into a classic era with a number of well-chosen enhancements. Taking their cues from the stock whitewall tires, nostalgic white hand grips and the White Diamond Solo Saddle set a decidedly retro tone. The black piping

gives this classic seat a striking look, while its external springs soften the ride. The chrome Chizeled handlebar*, low-set Tribal mirrors and the chrome swingarm complete the profile, while the Screamin' Eagle® Street Cannon slip-on mufflers boost performance to thoroughly modern levels.

FIT

Parts list available at h-d.com/gallery

The Chizeled handlebar* provide an upright "fists in the wind" riding posture with a '70s lane-splitting narrow profile. For a clean, custom look, the "Z" bar features cast mitered corners for easy internal wiring.

FUNCTION

Cool can be practical. Equipped for a run to the pool hall or for a night on the town, this narrow and nimble ride is perfect for squeezing through traffic. Add a swingarm bag, and you can stash your stuff in style.

STYLE

With its smooth metal seat pan and simple frame cover, the Solo Spring Saddle delivers a clean, finished old-school look—without any frame cutting or modifications. So you can always install a traditional two-up seat when you want to take someone along for the ride.

PERFORMANCE

The Screamin' Eagle® Street Cannon slip-on mufflers provide free flow of exhaust gases with just the right amount of back pressure for a smooth-running ride, an exhaust note with extra deep bass, and performance you can feel.

*Handlebar height is regulated in many areas. Check local laws before installing.

CARE AND MAINTENANCE

While it's tempting to use standard "auto parts store" cleaning and service supplies, hold out for the real thing. Genuine Harley-Davidson® coolant, oils, filters, batteries and service parts are engineered for the unique surfaces and operating conditions your Harley® motorcycle will encounter.

CRAFTSMANSHIP

We design and build the bikes, so we don't need to "reverse-engineer" parts to try and make them fit. Everything we make is rigorously tested to ensure it meets our high standards, and the finishes of our accessories match the bike's surfaces for a consistent appearance.

A. H-D® DETACHABLE COMPACT WINDSHIELD FOR MODELS WITH AUXILIARY LIGHTING

Whether it's for keeping bugs off your face or warmth in your body, a windshield has a huge impact on rider and passenger comfort. By diverting air pressure past your chest and over your helmet, a windshield can add hours of riding comfort. B. VENTILATOR QUICK-RELEASE COMPACT WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and re-installed in seconds to match your riding mood.

The windshield mounts to the fork tubes with elegant die-cast lever-release clamps, so the windshield does not require any "leave-behind" docking hardware. You get quick on-and-off convenience and a clean, custom look. No tools are required and the kit includes everything needed to install the windshield. SEAT OF POWER

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you — and your passenger.

PAMPER YOUR BEHIND

Experience ultimate comfort. Road Zeppelin® seats and seat pads are equipped with a unique air bladder system that distributes rider weight across the entire seating surface. By reducing pressure points and providing shock absorption, this pad allows you to ride your cool low-profile seat for hundreds of miles. The mesh cover lets air circulate beneath the rider's body, reducing the temperature between the rider and seat. The easy-to-reach integrated hand pump and air release valve permits quick and convenient adjustment.

CHANGING YOUR SEAT

Switching out your seat is simple. And because certain rides call for certain styles, some folks like to have multiple seats to match the occasion. Install a comfortable, supportive touring seat for the longer treks and swap it out for a low-profile seat for a night on the town. Please see your owner's manual for proper removal and installation of seats.

SPORTSTER® SEAT TYPES

Solo or two-up, comfort or style, check out these seats to get an idea of where you want to sit.

LOW-PROFILE SEATS

These saddles combine radical styling with a "deep-in-the-bike" riding position. Long and lean, Badlander®, Brawler® and Sidekick® seats bring you lower to the ground than most other seats.

REDUCED REACH® SEATS

Get even closer. This Solo Seat is shaped to move the rider 3.0" forward and 1.0" lower for a confident reach to the hand and foot controls. The narrow nose brings the legs 1.0" closer together for a comfortable reach to the ground and the scooped bucket-shape and back support keeps the rider from sliding backward during acceleration.

TOURING SEATS

Designed for comfort, Sundowner™ and Signature Series® seats offer a broad seating surface to reduce pressure points and a dished shape holds you in place and provides additional back support.

CUSTOM SEAT PROGRAM

A personalized seat is the perfect thread to tie your bike's attitude together. Select the stitching pattern, leather inlay and thread color that best support your custom movement and you'll have your personalized seat in just three weeks. A fine, aged patina and character wrinkles are a sign of the extremely high quality materials used to construct your seat or backrest. The appearance of scars or marks on the leather are a result of using natural leather panels and should not be thought of as an imperfection. A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feeling of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

SUSPENSION

While most current Sportster® models are already equipped with low-profile suspension, Harley® offers optional two-up shocks that maintain the low ride height and add additional carrying capacity. Or, if you are willing to exchange the low-profile "slammed" look for improved ride comfort, Comfort Flex standard-length shocks deliver an improved ride through a longer stroke.

ESTABLISH YOUR POSITION

HANDLEBARS

Where the bar positions your hands, wrists and arms directly affects how you feel on the motorcycle. The shape of the bar determines your reach to the hand controls and, therefore, your overall comfort.

SEATS

The right seat is equal parts ergonomics and comfort. Its shape anchors your position and determines the reach to the ground and to the controls and the padding supports your tailbone and hips to relieve stress and pressure. Pick the right one for you – and your passenger.

FOOT CONTROLS

Where your feet contact the controls can often determine how many miles you can put on in a day. Mid-controls position your feet below the knee for a sporting riding posture, while forward controls stretch your legs for a relaxed, laid-back posture.

B. REDUCED REACH FORWARD CONTROL CONVERSION KIT (50700026 SHOWN)

B. REDUCED REACH FORWARD CONTROL CONVERSION KIT*

Love the look and riding position you get with forward controls but not comfortable with the long stretch forward? This Forward Control Conversion Kit repositions the Original Equipment footpegs and foot controls up and back by 2.0" and positions the controls closer to the rider for added comfort and confidence. This kit provides additional leg clearance around the chassis and air cleaner by moving the footpegs outward 1.5" (left) and 0.5" (right). The reduced reach places the rider's boot at the proper pivot point for improved leverage, while maintaining the "foot-forward" riding profile. This easy-to-install Conversion Kit includes heavy-duty steel mounts and shortened brake rod and reuses Original Equipment control supports and brake and shift levers or can be personalized with your choice of custom lever styles.

The forward location provides an open path for your feet to aid maneuvering the bike while parking and improves access to the jiffy stand for a shorter rider. Kit includes control mounts, brake and shift levers, brake rod, mini-footboards with wear pegs and all hardware necessary to convert your mid- or forward-control equipped Sportster® model.

Designed to be a plug-in replacement for the factory horn, this easy-to-install option is available in your choice of brilliant chrome or gloss black finish. The traditional Bar & Shield logo adds a classic finishing touch.

G. SIDE-MOUNT LICENSE PLATE KIT – BLACK

G. SIDE-MOUNT LICENSE PLATE KIT

Add a clean, custom look to the rear fender. This stylish kit moves the license plate from the fender to a side-mount location, visually lowering the bike's profile and opening up the view of the rear end. This strut-mounted hinged frame conceals the license mounting hardware and features a smooth back that hides the unfinished side of the plate. Kit includes LED license plate illumination and a curved Bar & Shield medallion, shaped to conceal the original license mounting holes in the fender. Purchase of tail lamp without license illumination window is recommended for models with center-mounted tail lights.

NOTE: License plate location and fold-away feature is regulated in many areas. Check local laws before installation.

Fits '04-later XL models (except XL1200T). Will not fit some International Specification '14-later XL883N (Iron 883) models with Original Equipment LED Turn Signals. See your dealer for details. Will not fit models equipped with rigid mount saddlebags, rigid mount sissy bars and Turn Signal Relocation Kit P/N 68732-02A and 68733-02A.

Complete "bolt-on" fender kit includes everything you need to convert your '04-later Sportster® model to the chopped rear fender look.
