STREET GLIDE® SPECIAL TRANSFORMATION

If you're looking for stripped-down bagger style, highway comfort, and modern technology, the Street Glide® Special motorcycle delivers it all—with a decidedly unruly attitude.

GREEN WITH ENVY

This sweet Street Glide® Special motorcycle is all about blurring the lines between a classic touring bike and hot-rod bagger. It starts with the rich Deep Jade Green finish that carries all the way through to the color-matched batwing inner fairing and stretched BOOM!™ Audio saddlebags.

It builds when everything else is dipped in chrome—from the Aggressor wheels and fork sliders to the tip of the Mini-Ape Handlebar* and the Nightstick exhaust. And it's finished with the addition of removable Chopped Tour-Pak® luggage. Only then do you get to see the complete picture.

Parts list available at h-d.com/gallery

Throw your fists to the wind with the Mini-Ape Handlebar*. Shaped to rest your hands just above the top of the classic batwing fairing, these bars feature a tall stance and minimal amount of pull back that help to achieve a cool yet comfortable riding profile.

FUNCTION

From a solo ride to work to a two-up ride across the country, the Street Glide® model can be anything you want it to be. With the turn of a thumbscrew, you change the seat—from the twist of the H-D® Detachables™ cam lock, you can install a backrest or Tour-Pak® luggage.

STYLE

Chrome is king. The wide-open Aggressor wheels and rotors add lightness to this Street Glide® model's profile, and focus your eye on the brilliant finish on the Twin Cam engine and Slipstream hand and foot controls.

PERFORMANCE

The Screamin' Eagle® Ventilator Elite air cleaner and Nightstick 2-into-2 mufflers work together to pass a large volume of air through the 103HO Twin Cam engine—delivering maximum performance and an aggressive exhaust note.

Windshields – Road King®

A. WIND SPLITTER VENTED WINDSHIELD

Reduce helmet buffeting at speed. The Harley-Davidson® Detachables™ Wind Splitter Vented Windshield features an exclusive fingertip-adjustable center vent that reduces turbulence behind the windscreen. When open, the controlled airflow fills the negative pressure area behind the shield and helps to smooth the flow of air over the top of the screen and around the rider. The revised flow reduces helmet bobbing and neck fatigue so you can comfortably spend more time in the saddle. The open vent also provides cooling airflow to the rider at low speeds and in city traffic.

Engineered to provide the riding comfort of a larger windshield, this low-profile screen's contemporary contour sets it apart from the crowd. The shape keeps the windshield below your site line so you don't look through bugs and road grime and the detachable design means you can ride without the shield when the mood strikes. The shield is formed of hard-coated polycarbonate for strength and scratch resistance and the dark-smoked finish reduces glare. The slim polished stainless steel brackets mount to the Original Equipment rubber isolated docking points for ease of installation and removal.

57400176 **\$429.95**

Fits '94-later Road King® models (except FLHRS). Does not fit with Mini Tach or Boom!™ Audio Cruiser Speakers Stock on '13-'14 FLHRSE. Windshield dimensions: Overall height – 22.4" height from headlamp opening – 16.1", width – 20.3".

B. VENTILATOR KING-SIZE H-D® DETACHABLES™ WINDSHIELD

In a nutshell, a windshield should provide a barrier between the rider and errant bugs, discarded cigarette butts, flying debris and bad air. The shield should manage airflow and wind blasts to create a pocket of still air for both rider and passenger comfort. But if you ride in a warm climate or spend time at low speeds stuck in traffic, you need to keep some air circulating around your body to stay comfortable. The Ventilator Windshield features clear injection-molded vents that allow you to adjust the airflow to match the riding conditions. Opening the vents redirects the air across your chest for a cooling effect and closing the vents provides maximum wind and weather protection. But when you want to ride "naked," the detachable shield can be removed completely and reinstalled in seconds to match your riding mood.

Windshields – Electra Glide®

A. WIND SPLITTER WINDSHIELD – BATWING FAIRING

In the world of functional performance, size does matter. After all, it's simple to understand that the larger the windshield area, the greater the amount of wind deflection. The Wind Splitter Windshield is a great look for all Touring models and is shaped for the perfect combination of effective airflow management and "wow" styling. The sweeping design complements the shape of the fairing and the inner dash panel and adds height over a traditional low-profile wind deflector in the center where it counts. The shape decreases wind noise and improves your ability to hear the motorcycle's sound system. The rich smoked finish does not interfere with your forward view and looks great against any paint color. The easy-to-install Wind Splitter features a center-mount Bar & Shield medallion for a distinctive finishing touch.

C. SPORT WINDSHIELD

Combine the mini-shield styling of a wind deflector with a little extra wind protection. This 10.0" Sport Shield features a traditional wind screen shape, but adds a forward "flip" to the trailing edge to deflect the air flow over the rider. You get a shield that's still easy to look over, but without the turbulence usually associated with a short wind deflector. The light-smoke shield is formed from hard-coated polycarbonate for strength and scratch resistance.

Windshields – Road Glide®

A. WIND SPLITTER WINDSHIELD – ROAD GLIDE®

In the world of functional performance, size does matter. After all, it's simple to understand that the larger the windshield area, the greater the amount of wind deflection. The Wind Splitter Windshield is a great look for all Touring models and is shaped for the perfect combination of effective air flow management and "wow" styling. The sweeping design complements the shape of the fairing and the inner dash panel and adds height over a traditional low-profile wind deflector in the center where it counts. The shape decreases wind noise and improves your ability to hear the motorcycle's sound system. The rich smoked finish does not interfere with your forward view and looks great against any paint color. The easy-to-install Wind Splitter features a center-mount Bar & Shield medallion for a distinctive finishing touch.

Fits '15-later Road Glide® models.

Seating – Road Zeppelin®

ROAD ZEPPELIN® AIR ADJUSTABLE SEATS

The open road. That's where we developed and tested the revolutionary comfort of the Road Zeppelin® Seat. This remarkable seat removes pressure points and "hot spots" by adjusting the amount of air contained in each bladder within the seat. Easy-to-reach rocker switches on the side of the seat control the built-in compressor, adding and bleeding off air with the quick push of a button to help relieve stress from the lower back, tail-bone or lower extremities. On a long run, occasionally inflating and deflating the air bladders reduces the "numb butt" effect by improving the blood flow to the extremities. So grab a seat. And enjoy the ride.

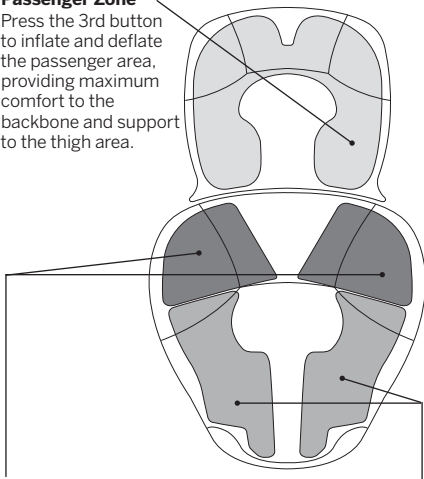

A. ROAD ZEPPELIN AIR ADJUSTABLE SEAT – '08-LATER MODELS

This Road Zeppelin Seat features two adjustment zones for the rider and one for the passenger and an internal air compressor that adjusts the air level nearly twice as fast as the previous version. The ergonomically-friendly seat design features a narrow front nose for ease of touching the ground at a stop, with a wide seating surface for long range rider and passenger comfort. This seat is a great addition to Trike models too. The easy-to-clean vinyl seat is finished with an embroidered Road Zeppelin logo that lets everyone see that you take riding comfort seriously. This easy-to-install seat accepts a rider backrest and passenger grab rail for additional touring comfort.

The mesh cover allows air to circulate beneath the rider's body, reducing the air temperature between the rider and seat. The easy-to-reach integrated hand pump and air release valve permits quick and convenient adjustment. COMFORT ON THE GO

Sometimes you need more than your bike to make it a great ride. Tour-Pak® luggage holds plenty of rain gear, extra clothing and basic supplies, while a detachable backrest means a passenger can take on the road with you.

THE RIGHT COMBINATION

PUTTING IT TOGETHER

A detachable sissy bar upright and backrest pad is the starting point for a complete touring machine. Start by shopping the following pages and selecting all the components required for your particular model.

EQUIPPED FOR THE MILES AHEAD

Solo and stripped down, two-up and fully loaded or anywhere in between, you can tailor any Harley-Davidson® motorcycle to meet the demands of the highway.

TWO-UP

Take a day's ride on a bike built for two. Saddlebags carry clothes and the essentials, while a Sissy Bar Backrest provides hours of passenger comfort on the open road.

TWO-UP TOUR-PAK® LUGGAGE

The ultimate road trip. With all this space and comfort, you and one lucky passenger are fully equipped to go wherever you want, for as long as you want. See you later.

SOLO TOUR-PAK LUGGAGE

Ride like you're on a mission. The saddlebags and Tour-Pak offer tons of storage space and the Solo Mounting Rack positions the Tour-Pak Pad for maximum rider back support.

LOAD IT UP

Rain gear, extra clothing and basic supplies are easy to take along when you add luggage to your bike. Designed for maximum versatility, this complete collection of sissy bar- and luggage rack-mounted soft touring luggage ensures you will pack what you need for your next trip.

Designed by riders, for riders, the Premium Luggage Collection is formed of superior heavy-weight ballistic nylon to maintain their shape and protect your belongings over the long haul. And the secure spandex mounting system slips over the passenger backrest for a snug fit.

CHANGING YOUR BACKREST

With a Docking Hardware Kit installed, adding or removing a detachable accessory is a simple "slide and click" proposition. Rotate the cam-lock to release the sissy bar from the rear docking points. Pivot the sissy bar forward and lift it free from the front docking points.

NEVER IN A TIGHT SPOT

On the road, you've got to feel good in the saddle. Whether you're cruising around town or out for the long haul, your bike should welcome you like an old friend and feel like an extension of yourself. So, once you've picked the bike, it's time to choose the suspension that best equips your ride to your personal dimensions.

A STRONG FOUNDATION

Being sure-footed at a stop or when parking your bike enhances your feelings of control and confidence. Adjusting the ride height by lowering the suspension may be the first step in fitting the bike to your inseam length. Combining a low-profile suspension and a narrow seat is the easiest way for a shorter rider to fit comfortably on a larger bike.

Suspension

A. PREMIUM RIDE HAND-ADJUSTABLE TOURING SHOCKS*

Experience the ultimate in superior ride quality with these Premium Touring Shocks. These shocks utilize a single tube, nitrogen charged emulsion design. The design offers enhanced compression and rebound damping compared to the Original Equipment-style air adjustable shocks. This provides a controlled yet plush ride with much less bottoming. Larger chambers (40mm diameter pistons and 14mm rods) allow these shocks to react more quickly to impacts. This keeps the tires tracking while minimizing harshness transmitted through the frame. A simple knob behind the left saddlebag allows the rider to conveniently modify the spring preload via a hydraulic adjuster. Available in Standard Ride Height and Low Ride Height versions.

TOURING SUSPENSION AIR PUMPS

This pump was designed to allow safe and simple adjustment of the front and rear air suspension on Touring motorcycles. Unlike a bicycle pump or a fuel station air hose, the hand-operated pump with controllable "micro bleed" valve allows precise adjustment to air volume, and the "no loss" air connector maintains shock pressure when the fitting is removed. The swivel air hose simplifies valve stem attachment.

C. ANALOG TOURING SUSPENSION AIR PUMP
