

GARAGE

Protect your investment. Sun, moisture, bugs and road debris can take their toll on your bike's external and internal finishes. That's why we've spent thousands of hours formulating cleaning and maintenance products. Unlike common "auto parts store" brands, these products are designed specifically for H-D® motorcycles and work together without adverse reactions.

MORE THAN AN OIL CHANGE

Harley-Davidson® dealers will service your motorcycle with factory-approved methods and equipment. Dealership technicians are specially trained and use advanced technologies to properly diagnose and maintain your bike. Whether it's your first 1,000-mile checkup, 20,000-mile service, or anything in between, your dealership should be your service destination.

THE WELL-EQUIPPED GARAGE

Adventure always comes at a price, especially for a motorcycle. The sun, moisture, bugs and road debris can take their toll on the bike's external and internal finishes. But, if you have the right tools for fighting through miles and miles of the highway's abuse, you'll be more than ready to ride for years.

FLUIDS

Whether it's oil, brake fluid or Screamin' Eagle® SYN3™ Synthetic Motorcycle Lubricant, all Harley-Davidson® fluids are developed exclusively for use in Harley-Davidson motorcycles, making them a must-have in your garage.

FILTERS

Don't overlook the essentials. Harley-Davidson air and oil filters keep debris out of your engine and help keep it healthy. So replace them routinely and insist on using only the genuine article.

STORAGE

Premium motorcycle covers, bike lifts and wall-mounted detachable storage units protect your bike and keep your garage organized.

LOCKS

Secure your Harley with street-proven cables, anchors and locks designed specifically to deter and prevent motorcycle theft. Go one step further and add a factory security system or universal alarm for even more peace of mind.

TOOLS

Every bit as rugged as our motorcycles, Harley-Davidson tools and tool kits boast a compact, lightweight design developed specifically for use on your Harley.

BATTERIES

Genuine H-D® Batteries feature AGM technology for higher cold cranking amps, longer life and improved rechargeability.

CLEANING TIPS FROM THE MOTOR COMPANY

We understand how important a clean ride is to you. That's why we've spent thousands of hours formulating cleaning and care products designed specifically for H-D surfaces and finishes. Unlike common "auto parts store" brands, these products are designed to protect your investment and will work together without adverse reactions.

CHECKLIST FOR COMMON CLEANING ISSUES:

- Before applying any protective or cosmetic product, you should always start off by washing your motorcycle with Sunwash® Bike Soap.
- Don't detail your bike in the direct light of the day. Sun-warmed clearcoat and hot surfaces may streak and swirl when drying.
- To soften melted-on boot marks and tar from exhaust pipes, apply Boot Mark Remover and let it set for a few minutes. Then scrape away the gunk with a Soft Cloth.
- The natural acid in bug splatter is damaging to surface finishes, so be sure to act quickly. Apply Bug Remover, wait a minute to soften the residue, and rinse away the debris.
- To remove adhesives, tar, tree sap and pollutants, dab on Glaze Poly Sealant, wait, then wipe it clean with a Soft Cloth.
- Is your leather looking dull? Black Leather Rejuvenator's pigmented formula restores the luster, and Leather Protectant weatherproofs the surfaces.
- Whitewalls a little dirty? Apply Harley® Wheel & Tire Cleaner with the Soft Detailing Pad to make them gleam.
- To revive dull seats, inner fairings and plastic surfaces, mist on Trim Cleaner and wipe away the dust and grime.
- To protect plastic, painted, and chrome-plated surfaces, apply Glaze Poly Sealant. This cream combats fading and oxidation, and its ultrafine leveling agent removes minor blemishes.
- Don't have time for a complete detailing session? Use Harley Gloss or Harley Spray Cleaner & Polish for quick jobs between applications of Glaze Poly Sealant.

Cradles & Lifts

A. CRUISER CRADLE WHEEL CHOCK

This sturdy aluminum wheel chock will hold your bike securely on the ground, on a trailer, or in the back of a pickup truck. Sized to fit most motorcycles, this wheel chock will keep your bike upright while you are storing, transporting or working on your bike. Designed for roll-on roll-off use, the rocking cradle allows one person to easily park their bike in the stand. Just roll the bike into place and dismount. The Cruiser Cradle holds the bike in place without straps. Upright storage saves garage space and permits easy access to both sides of the vehicle.

Cruiser Cradle's utility is not limited to the garage. The light-weight, folding wheel chock is easy to transport. Use it on the driveway when you are washing your bike, or, when equipped with the optional Trailer Adapter, the versatile wheel chock can be easily moved to a trailer or the back of a pickup truck. The one-person operation simplifies securing the bike for transport. Load the bike into the Cruiser Cradle, dismount, and the bike remains upright. Just two tie-down straps are required to hold the bike in place. And because you don't need to overtighten the straps, you won't damage sensitive suspension parts and handlebar bushings.

92900001 **\$249.95**

For use with models with vehicle weight up to 3000 lb (1360 kg) and front or rear wheel size of 14" to 22" (355–560mm) rim diameter and 3.15" to 8.66" (80mm–220mm) nominal wheel width.

F. VALVE STEM EXTENSION

Sometimes there's just not enough space around the tire's valve stem for the gas station air chuck and hose to reach. Brake rotors, sprockets and saddlebags get in the way and keep the air chuck from making an airtight seal. When that happens, this Valve Stem Extension provides easy access. Simply screw the extension in place on the stem, fill the tire to the proper pressure, remove the extension, and replace the valve stem cap. Then toss the extension in your saddlebag or tool roll for the next time.

ENGINE OIL FAQ'S

HOW OFTEN SHOULD I CHANGE MY MOTORCYCLE ENGINE OIL?

You should change your motorcycle engine oil and engine oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter. If you ride your motorcycle hard, under dusty conditions, or in cold weather, the engine oil and filter should be changed more often. You should always change your engine oil and filter prior to winter storage (or any extended storage) so that your engine oil is clean and free of contaminants during this time period.

CAN I GO LONGER BETWEEN OIL CHANGES BY CHANGING THE FILTER?

NO! The job of the oil filter is to remove dust, soot and other solid matter. Filters cannot remove water, gasoline or acids and cannot do the job of oil additives that have been used up. You should change your oil filter at the first 1,000-mile service interval and at every 5,000-mile service interval thereafter or prior to winter or extended storage periods.

WHAT VISCOSITY GRADE SHOULD I USE IN MY HARLEY MOTORCYCLE?

The recommended viscosity grade for all temperature conditions is SAE 20W50 Harley-Davidson® Motor Oil. SAE 10W40 H-D® Motorcycle Oil is also available and appropriate for low temperature climates. The SAE 50 H-D Motorcycle Oil is satisfactory in ambient temperatures of 60-80°F, and the SAE 60 H-D Motorcycle Oil in ambient temperatures above 80°F. SAE 20W50 covers the broadest range of operating temperatures.

SYN3® ENGINE, PRIMARY AND TRANSMISSION OIL FAQ'S

WHAT ARE THE KEY BENEFITS TO USING SYN3 MOTORCYCLE LUBRICANT?

- SYN3 Lubricant offers improved film strength for superior wear protection at high temperatures, and improved deposit control for a cleaner engine, transmission, and primary chaincase.
- SYN3 Lubricant can be used in the engine, primary chaincase, and transmission.
- SYN3 Lubricant is formulated for reduced oil consumption, improved wear protection, high-temperature stability, and superior overall field performance.

WHAT'S THE DIFFERENCE BETWEEN SYNTHETIC AND PETROLEUM-BASED LUBRICANTS?

Both synthetic and petroleum-based lubricants are derived from the same crude oils. But that's pretty much where the similarities end. Unlike their petroleum-based counterparts, which inherit physical components (including contaminants) of the source crude oil in the refining process, synthetic lubricants are manufactured from basestocks that are custom-designed from scratch to have desired properties for specific purposes, meaning that engineers have complete control of the lubricant from start to finish – at the molecular level.

WHAT DOES SYN3 FULL SYNTHETIC MOTORCYCLE LUBRICANT DO FOR MY DRIVETRAIN?

SYN3 Full Synthetic Motorcycle Lubricant offers all the benefits of Genuine Harley-Davidson 360 Motorcycle Oil, and:

- Offers superior wear protection at higher temperatures
- Keeps engines, transmissions and primary chaincases cleaner
- Meets the anti-wear lubricity requirements of all transmission gears
- Lubricates all primary chaincase components
- Delivers smooth, sure clutch operation
- Provides long-term protection of all internal components
- Improves seal and gasket performance
- Offers superior performance in high-output engines

WHEN CAN I START USING SYN3 FULL SYNTHETIC MOTORCYCLE LUBRICANT?

Right away. SYN3 Full Synthetic Motorcycle Lubricant is approved for all stages of engine life, including the first service interval – which means it's not detrimental to engine break-in. You can even use it as a first fill upon delivery of a new motorcycle.

SINCE SYN3 FULL SYNTHETIC MOTORCYCLE LUBRICANT IS A HIGH-PERFORMANCE LUBRICANT, CAN I WAIT LONGER BETWEEN CHANGES?

No. As with petroleum-based engine lubricants, you should drain and replace the synthetic motorcycle lubricant in your engine at every 5,000-mile service interval. You should also change your oil filter anytime the engine lubricant is changed. If you ride your motorcycle hard, under dusty conditions, or in cold weather, you should change your SYN3 Synthetic Motorcycle Lubricant and oil filter more often. You should always change your engine lubricant and filter prior to any extended storage so that your engine is clean and free of any contaminants during this time.

B. GENUINE HARLEY-DAVIDSON H-D® 360 MOTORCYCLE OIL

Harley-Davidson Genuine H-D® 360 Motorcycle Oil is developed and tested for use in Harley-Davidson motorcycles. Our unique additive package helps prevent engine wear and helps keep your engine cooler, cleaner, and free of sludge, varnish and corrosion.

Harley-Davidson air-cooled V-Twin motorcycles operate at higher temperatures than water-cooled engines, thus a specific high temperature additive package is necessary to protect the engine. Be assured, H-D 360 Oil can be trusted in a Harley-Davidson engine.

Available in SAE 10W40, 20W50, SAE 50, and SAE 60. Refer to your Harley-Davidson owner's manual for the proper SAE grade recommendation based on the climate and temperature range you ride in.
